

SILENTLY LOOSING THE BRAIN

The enigma of small vessel disease

The Brain Prize Meeting 2019

November 25 - 27 2019 in Copenhagen

With international keynote speakers, including the 2019 prize winners, The Lundbeck Foundation Brain Prize Meeting aims to bring a broad range of researchers to discuss why small vessel disease has emerged as a major contributor to dementia, migraine and stroke worldwide.

In a mash-up of state-of-the-art clinical and experimental research, this meeting will be the perfect stage for discussing how this up-and-coming field will progress from here.

We hope for participants to build an international network and relationships and to exchange knowledge and ideas.

WHERE

Comwell Borupgaard

Snekkersten | Denmark (1 hour north of Copenhagen)

KEYNOTE SPEAKERS

Anne Joutel | Inserm, Paris
